

SURFEX

The complete event for surface & coatings technology

A Catalyst for Innovation

Surfex offers all attendees opportunities to solve technical issues, find new ideas or discover innovative concepts that can spark a whole new generation of products.

This kind of outcome is achieved at an industry gathering of like-minded people in a focused and stimulating environment.

Exhibition & TechFocus
Ricoh Arena, Coventry, UK
2-3 JUNE 2020

Organised by:
 **OCCA**
The Oil & Colour Chemists' Association

Growing Support of Surfex 2020

A key feature of Surfex are the organisations and associations that support this important event in the UK coatings & surface technology. This support features a series of informative content delivered via the Industry Insight programme.

As well as the Oil & Colour Chemists Association (OCCA) – joint organisers of Surfex – key contributors to the Industry Insight programme include the Royal Society of Chemistry – Surface Coatings Industry Group (RSC – SCIG) and the British Adhesives & Sealants Association (BASA).

The contributions of key supporters ensures that Surfex features key trends in technologies, techniques and developments overall in terms of appearance, functionality, durability, environmental footprint, and cost targets.

Potential areas considered include sustainable coatings / bio-based coatings, nanomaterials and non-petrochemical components.

To that extent, the Nanotechnology Industries Association (NIA) has agreed to support Surfex to enhance the Industry Insight programme and delivery content of relevance and value to attendees.

A New Home for TechFocus

The TechFocus presentations and workshops are a major component of Surfex. This programme of applications oriented technical achievement is the who, what & how of design, development, manufacture and delivering products to market from the extensive list of exhibitors.

To enhance this opportunity for attendees at Surfex to discover a World of new ideas, answers to technical challenges and to gather the most up to date information for

immediate use, the TechFocus programme will be housed in a superb, brightly lit seminar facility in the exhibition area.

This facility – called the Evolution Dome – is not only eye-catching, but also creates an ideal environment for exhibitors to share their latest developments, newest ideas, most recent technologies and to offer solutions to those that attend Surfex.

The Exhibition

Surfex is organised in recognition of the importance of keeping up to date with all aspects relating to innovation, development, manufacture and supply of coatings, inks, adhesives and an array of allied and associated industries.

The exhibition is a unique opportunity to see the new, the proven, the everyday and the obscure.

36 companies have already signed up to showcase their latest developments in technique and technologies:

Blagden Specialty Chemicals
Brenntag UK & Ireland
BTC Europe
Buhler UK
BYK-Gardner Q.C Instruments
Camida
CDR Pumps UK
CelluComp
Cornelius Group
Devine Chemicals
DKSH Great Britain
Elcometer
FDL Packaging
Fullbrook Systems
Grolman
IKA England
IMCD UK
John Godrich
KRÜSS GmbH
Lake Coatings
Lankem
Lehvoss UK
Merritt Recruitment
NeoTech Specialty Chemicals
Omya UK
Plascoatings
Ravago Chemicals UK
Schoeller Allibert Swiss Sarl
Stort Chemicals
Tennants Distribution
The Oil & Colour Chemists' Association (OCCA)
The Rakem Group
TQC Sheen UK
Univar
Wilfrid Smith
Xyntra
