Stand No. 303

By Surfex Exhibition & Conference

“ New, New, New... ”

Who are IKA?

IKA is the world leading manufacture for innovative magnetic stirrers, mixers, overhead stirrers, homogenizers, shakers, mills, rotary evaporators, laboratory reactors and specially developed software for laboratory and analysis applications.

What have you been developing in 2020?

New for 2020 are our IKA Rotavisc Viscometer, Multidrive device, updated LR1000 lab reactor and the RCT Digital & Mini/Microstar.

Our Rotavisc can rapidly and accurately measure the viscosity of liquids/resins/gels etc. With modern features, local servicing and a lifetime warranty the Rotavisc is a reliable lab partner.

Who are your customers?

IKA work with laboratory and production staff across a variety of different industries. Our

production equipment is used in manufacturing at pilot and full scale production.

What makes you the market leader?

IKA are known for our high quality and robust equipment. We are always striving to produce laboratory and process equipment that meets the highest safety standards, is easy to use, that will last for years, and provide the power you need for your application.

What do you bring to Surfex?

Attendees will most likely know us for our well-known overhead and magnetic stirrers

for heating and mixing applications. These days we offer much more that can be used in the development or manufacturing of coatings. We will have our lab and process reactors on show to improve reproducibility and simplify scale up of new products. We will also be showcasing our Viscometers and new Multidrive units for wet and dry crushing applications.

What do your customers tell you?

Customers are always impressed by the longevity & robustness of our equipment. You can see reviews for yourself - [click here](#)
