

# ACRYLIC POLYMERS FOR PAINTS & COATINGS

## IPPOL SPW 5000

General purpose Styrene Acrylic copolymer emulsion with outstanding water and alkali resistance for use in interior and exterior matt and semi-gloss paints, textured coatings and primers.

## IPPOL PPW 5220

Pure Acrylic emulsion with excellent UV and moisture resistance for use in gloss and satin interior and exterior paints and coatings.

## IPPOL SPW 7000

Flexible Styrene Acrylic copolymer emulsion with high adhesion and moisture resistance, ideal for use in medium to high PVC interior and exterior paints and crack-bridging coatings and fillers.

## IPPOL SPW 7001

Flexible Styrene Acrylic copolymer emulsion with excellent water-resistance and tensile strength, for use in interior and exterior paints and roof coatings.
